## DETAILED ACTION

### *Information Disclosure Statement*

Document number A7 has not been considered, the patent no. and inventor name are incorrect. The Examiner has cited the correct patent on the Notice of References cited.

### *Priority*

Applicant should provide an amendment inserting Patent No. 6,644,084 into the blank space in the priority information provided.

### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-22 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-26 of prior U.S. Patent No. 6,644,084. This is a double patenting rejection.

The 6,644,084 patent claims an apparatus and method for transforming at least one ring on a battery terminal having a first shape into a second different shape with an undercut or overhang when the battery terminal and a rolling tool are rotated relative to each other.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
